Automatic Cotton Inserting Machine XCI-1

The XCI-1 cotton inserter is an upgraded model. Built with a compact, user-friendly design, it adjusts speed based on the size and type of your bottles—whether plastic or glass.

Moreover, this cotton inserting machine includes smart features like “no bottle, no insertion” and automatic fault detection. These functions help ensure accurate, reliable cotton placement every time.

Features

- ✓ **Simple Design:** Built for easy use.
- ✓ **Speed Adjustment:** Allows quick changes to match different bottle sizes and production speeds.
- ✓ **Broad Compatibility:** Handles both plastic and glass bottles in various sizes.
- ✓ **Smart Detection System:** No-bottle no-insert, self-fault checks, and cotton refill alerts.
- ✓ **Consistent Output:** Stable, accurate performance in high-demand operations.
