

Automatic Bottle Capping Machine PBX-160

The automatic bottle capping machine PBX-160 adopts a fully automatic process, including bottle feeding, cap sorting, capping, capping, tightening and bottle discharging. The whole process is highly automated and runs smoothly. Anxine automatic bottle sealing machine is also easy to clean and maintain, and it has good durability.

The automatic bottle cap sealing machine PBX-160 can be flexibly adjusted according to the height and size of the bottle cap and bottle body. Users can freely set the production output within the design range of the machine, thereby realizing flexible production plans and different process requirements. PBX-160 is particularly suitable for industries such as medicine, chemical industry, food, and

industry. The automatic bottle capping machine PBX-160 can also form a linkage production line with bottle sorting machines, tablet counting machines, paper plugging machines, sealing and labeling machines, etc., to further improve production efficiency.

Features

- ✓ **Multiple Bottle Compatibility:** Easily adjustable to fit different bottle types and sizes.
- ✓ **High-Speed Operation:** Capable of capping up to 160 bottles per minute.
- ✓ **GMP Compliance:** Meets stringent pharmaceutical industry standards.
- ✓ **Flexible Integration:** Can operate as a standalone unit or within a complete production line.
- ✓ **User-Friendly Adjustments:** Simple adjustments for belts and wheels without needing spare parts.
- ✓ **Durable and Reliable:** Designed for consistent performance and long-term use.

Technical Parameters

Model	PBX-160
Maximum Capacity	Up to 160 bottles/minute
Cap Size Range	Diameter 19-65 mm
Bottle Size Range	15-250 mL
Voltage	AC220V, 50Hz, single phase
Power	2500 W
Dimensions	2,600 x 1,100 x 2,000 mm
Weight	580 kg (with conveyor)
