

Bottle Unscrambler CLP-650

The CLP-650 bottle unscrambler machine is built for demanding, non-stop operations. It can handle an immense variety of bottle shapes, sizes, and materials with exceptional speed and precision. The CLP-650 quickly takes bottles from a stack, turns them upright, and sends them out in a strong, high-volume flow. This machine is known for its strong construction and consistent, reliable performance. It will help you start your fastest production lines. It's the best choice

for businesses that

want to process a lot of products and keep working efficiently on an industrial scale.

Features

- ✓ **Wide Use:** Perfect for pharma, cosmetics, and food/beverage. Handles many materials (glass, plastic) and shapes (round, square, flat square, irregular).
- ✓ **High Speed:** Can process 30 to 200 bottles per minute, greatly boosting line speed.
- ✓ **Easy Speed Control:** Adjust the machine's speed with a simple knob to match your production needs.
- ✓ **Safe & Dependable:** All electrical parts are grounded for safety. It's designed to be user-friendly and easy to run.
- ✓ **Simple Maintenance:** Clean daily by wiping (no spraying). Check parts monthly and grease gears for long-term use.
- ✓ **Meets GMP Standards:** All parts touching products are stainless steel, meeting strict GMP quality rules.

Specifications

Model	CLP-650
Application Range	Suitable for round bottles, square bottles, flat square bottles, and irregularly shaped bottles made of various materials.
Production Capacity	30~200 bottles per minute
Bottle Diameter	20-80mm
Power Supply and Power	AC220V 50Hz 0.1kW
Dimensions	826 × 1,034 × 1,172 mm
Weight	95kg
