

Horizontal Bag-feeding Sauce Packaging Machine NPP-160HL

The NPP-160HL horizontal premade pouch packing machine is a cutting-edge solution designed to meet the high demands of the food, pharmaceutical, chemical, and cosmetic industries. It is designed to be efficient. It can measure and package different types of products, such as granules, powders, liquids, and sauces. It uses pre-made bags, like the ones made from aluminum foil and plastic film. This machine can pick, open, fill, and seal a wide range of pouch types. It can do this reliably and at high volume, and it can make the packages look very nice. The NPP-160HL makes your packaging process easier, so it's a great choice for businesses that want high-quality, market-ready products.

Features

- ✓ **Advanced Control:** Easy, precise control with a smart system. Adjust settings quickly for perfect results.
- ✓ **Quick Changeover:** Switch products fast and easily. This cuts downtime and keeps your line moving.
- ✓ **High Accuracy Filling:** Get accurate, consistent fills every time. This means less waste and better product quality.
- ✓ **Operator Safety:** Built-in safety features like sensors and covers protect your team.
- ✓ **Easy Maintenance:** Simple design makes parts easy to reach. This means quick cleaning and maintenance.
- ✓ **Durable Build:** Built tough with high-quality materials. It lasts longer, even in demanding environments.
- ✓ **Energy Efficient:** Saves energy without losing performance. It's smart and powerful.
- ✓ **Integrated Alarms:** Smart alerts notify you about issues like low bags or clogs. This helps keep production running smoothly.

Technical Parameters

Model	NPP-160HL
Measuring Range	20-500 g
Bag Size	Length: 80-240 mm; Width: 65-170 mm
Packing Speed	20-35 bags/min
Total Power	AC220V, 50/60 Hz, 2 kW
Air Source Requirement	≥ 0.6 MPa
Dimensions	1424 mm x 980 mm x 1343 mm
Weight	450 kg
