

# Semi-Automatic Flat Labeling Machine T-30114

Compact yet highly capable, this semi-automatic flat labeling machine is built to handle flat and even curved surfaces. The T-30114 uses a sensor-based positioning system to ensure accurate label feed. It also has an integrated PLC-controlled touch screen that allows manual/auto setup and parameter adjustments. Its print head lets you imprint batch numbers or expiration dates without switching stations. The T-30114 is suitable for small-batch labeling operations, especially when space or budget doesn't allow for a fully automatic system. Built with durability in mind, this desktop label applicator

is a go-to tool for growing businesses that need precision and versatility.

## Features

- ✓ **Flexible Surface Labeling:** Capable of labeling on flat and curved containers.
- ✓ **Vertical Pressing Head:** Pneumatic pressing ensures clean, bubble-free label application.
- ✓ **Step Motor Drive:** Powered by a reliable stepper motor for stable label feeding.
- ✓ **Simple Touchscreen Control:** Intuitive control interface enables user-friendly setup and adjustments.
- ✓ **Photoelectric Label Sensor:** Detects label position accurately to minimize misalignment and waste.
- ✓ **Sturdy Construction:** Built with durable aluminum and stainless steel for long-term use.
- ✓ **Emergency Stop Button:** Provides protection against sudden failures.

## Specifications

Model	T-30114
Labeling Speed	10-25 pieces/minute
Label Diameter	Inner: 40mm/76mm Outer: ≤Φ350mm
Product Size	Length 10-180mm, Width 10-180mm, Thickness 0.2mm-120mm
Power	200W
Accuracy	±0.5mm
Voltage	110V/60Hz or 220V/50Hz
Dimensions	840 x 430 x 770 mm
Weight	95 kg
