

# Semi-Automatic Round Bottle Labelling Machine MT-50M

Need a no-fuss machine that labels round bottles and prints batch info in one go? The MT-50M does exactly that. It's purpose-built for labeling cylindrical containers like glass or plastic bottles, jars, and vials. This benchtop round bottle labeling machine is designed with a sturdy base, easy-to-adjust bottle rollers, and a built-in hot stamp coder. Just place your bottle, pull the roller, and let it do the rest.

This round bottle sticker labeling machine helps speed up hands-on labeling and

boost your output. In the meantime, it keeps everything neat and accurate—no complicated tech needed.

## Features

- ✓ **Precise Label Control:** Photoelectric sensor detection for accurate label placement.
- ✓ **Integrated Coder:** Built-in hot stamp foil coder prints product info.
- ✓ **Adjustable Roller Spacing:** Simple mechanical knobs allow quick fine-tuning to fit different bottle sizes.
- ✓ **Sturdy and Compact Design:** Small footprint fits well on tabletops. The stainless steel and aluminum body ensures durability.
- ✓ **Simple Setup and Maintenance:** Clear label threading path and tool-free adjustments make it beginner-friendly.
- ✓ **Stable Label Feed System:** Equipped with a stepper motor and tension controls to ensure wrinkle-free label application.

## Technical Parameters

Model	MT-50M
Labeling Speed	25-50 pieces/min (varies with product and label size)
Label Size	Width 20-130mm / Length 30-280mm
Product Diameter	Φ20-120mm
Label Reel	Inner diameter 75mm / Outer diameter 250mm
Accuracy	±0.5mm (depending on product and label size)
Voltage	220V 50Hz / 110V 60Hz
Dimensions	820 x 340 x 545 mm
Weight	29 kg
