

Semi-Automatic Small Blister Packing Machine ABM-I

For operations that need more output than a desktop unit, but more flexibility than a fully automatic line, the ABM-I semi-automatic blister packing machine is the perfect choice. This strong machine makes your packaging process easier. People load blister sheets and products into it, and the ABM-I efficiently handles precise sealing. It makes high-quality, tamper-evident blister packs for pharmaceuticals, nutraceuticals, medical devices, and specialty consumer goods. The ABM-I makes it easy to produce products consistently and maintains strict quality standards. This makes it a valuable asset for small to medium-volume productions.

Features

- ✓ **Strong, Consistent Seals:** It has cylinder-driven sealing for strong pressure and an intelligent temperature controller for consistent seals.
- ✓ **Simple to Use & Maintain:** The machine is easy to operate and maintain. It has a simple control panel and quick-change molds. You don't need to disassemble it.
- ✓ **Built to Last:** These high-quality electrical heating bars are built to last and will work well for a long time.
- ✓ **Lightweight & Portable:** It's made from strong aluminum, and it has a handle, so you can move it around easily.
- ✓ **Operator Safety:** It comes with a protective cover to help prevent injuries during operation.
- ✓ **Optional Batch Printing:** You can add a steel stamp that can print batch numbers and dates directly on your packs.
- ✓ **Boosted Efficiency:** The improved mold and pneumatic parts help increase production speed and quality.

Specifications

Model	ABM-I
Max. Heating Area	135×115 mm
Heating Temperature	90-150°C
Heating Time	3-6 seconds
Air Pressure	0.6-0.8 MPa
Air Displacement	0.12 m ³ /min
Air Supply Port Diameter	10 mm
Power	1000 W
Power Supply	110V 60Hz / 220V 50Hz
Dimensions	320×300×375 mm
Weight	21 kg
