

Automatic Powder Grinder Machine YF-150B

YF-150B small crusher is small in size, light in weight, fast in crushing and safe and reliable. It is widely used in Chinese and Western medicine, food, chemical industry, scientific research institutions and other fields to meet the small-batch processing needs of various materials.

Features

✓ **Compact and Convenient:** Small size and light weight, easy to carry and store, suitable for laboratories, small workshops and other scenarios.

✓ **Efficient Crushing:** Fast crushing speed, time-saving and labor-saving, greatly improving small-batch

processing efficiency.

✓ **Safe and Reliable:** High safety performance, effectively avoiding operation hazards and ensuring operator safety.

✓ **Widely Adaptable:** Covering medicine, food, chemical industry, scientific research and other fields, meeting the processing needs of various materials.

✓ **Easy Maintenance:** Simple cleaning steps, easy disassembly of blade set and grinding disc, low maintenance cost.

Technical Parameters

Model	YF-150B
Power	1300 W
Voltage	220V / 50Hz
Fineness	30–300 mesh
Capacity	500 g/min
Speed	25,000 r/min
Weight	8.5 kg
