

Automatic Dual-Head Cotton Inserter XCI-2

The Anxine XCI-2 Fully Automatic Dual-Head Sponge Inserting Machine utilizes a dual-station synchronous operation mode to automate the entire process of sponge length measurement, cutting, conveying, and insertion. Its production capacity can be infinitely adjusted to accommodate the specific requirements and characteristics of various bottle types.

Designed in strict compliance with GMP hygiene standards, this machine features a sophisticated structure and is easy to maintain. It is widely applied in industries such as pharmaceuticals, food, personal care, and cosmetics, providing effective shock absorption, moisture resistance, and stabilization for bottled products, thereby ensuring safety during storage and transportation.

Features

- ✓ **Intelligent precision insertion:** sponge fixed-length cutting, precise feeding into bottles, with zero-gap positioning and no deviation.
- ✓ **Dual-station high-efficiency production:** supports stepless speed adjustment and adapts to various bottle specifications for enhanced output.
- ✓ **Smart touch control:** user-friendly HMI for convenient operation, with full-process intelligent monitoring.
- ✓ **Intelligent safety protection:** automatically avoids missing or misplaced stoppers, eliminating material waste.
- ✓ **Easy cleaning and maintenance:** all stainless steel body, compact and simple structure for quick upkeep.
- ✓ **Versatile application:** suitable for multi-industry bottle packaging, offering broad practicality.

Specifications

Model	XCI-2
Inserting Speed	40–60 bottles/min
Bottle Compatibility	Square: 30–100mm; Round: 30–100mm (Diameter)
Bottle Height	40–200mm
Sponge Specifications	Diameter: 33mm; Height: 16mm
Power Supply	AC380V, 60Hz, 1.5kW
Dimensions	2000 × 2050 × 1650 mm (Subject to actual unit)
Weight	Approx. 675kg (Subject to actual unit)
